

# O·P·I

## POWDER PERFECTION

### SINGLE COLOR APPLICATION

OPI Powder Perfection is an odor-free acrylic alternative that promotes a clean-air environment while offering gel-like shine & weeks of wear without the need to light cure. Use OPI Powder Perfection for protective overlay services on clients with weak, flexible nails that break easily.

#### BEFORE YOU BEGIN:

Complete Powder Perfection Nail Prep Step by Steps.

1

Brush on one coat of **Base Coat** to a single nail making sure to cover the entire surface of the nail evenly.

2

Immediately, dip the finger into the **Color Powder** at a 45° angle and tap off the excess powder. Repeat on remaining fingers. Complete one nail at a time in order to prevent the Base Coat from drying too quickly and not attaching to the powder.

3

With a sanitized **cosmetic brush**, dust off remaining loose powder from each finger.

**ProTip:** Focus around the cuticle area, side walls and don't forget under the free edge.

4

Apply a second coat of **Base Coat** and **Color Powder** to each nail according to **STEPS 1-3**.

5

Brush on one even coat of **Base Coat** and dip into **Clear Color Set Powder** at a 45° angle. Tap off the excess powder and dust off any remaining powder.

6

Apply one generous coat of **Activator** making sure to cover the entire surface of the nail. Cap the free edge to fully seal in the powder. Wait 1-2 minutes for the nails to harden.

7

Shape and contour the nails with a **180 Grit File**. When contouring, focus around the cuticle area and sidewalls to prevent a bulky looking enhancement. Buff the nail surface with a **180 Grit Buffer** and continue to smooth with a **220 Grit Buffer**. Remove excess filing dust.

8

Apply a second coat of **Activator** making sure to cover the entire surface of the nail. Wait 1-2 minutes to dry. Not waiting for the activator to fully dry will cause your Top Coat brush to harden.

9

Evenly apply one coat of **Top Coat** using 2-3 quick brush strokes. Wait 1-2 minutes to dry.

10

Using 2-3 brush strokes, apply a second coat of **Top Coat**, this time with precision. Wait 1-2 minutes to dry.

**ProTip:** Overworking the product or applying too much product will result in a matte finish.

11

Once dry, drop and massage **ProSpa Cuticle Oil** into cuticles.

## OPI PRODUCTS USED

- Powder Perfection Base Coat
- Powder Perfection Color Powder of choice
- Cosmetic Brush
- Powder Perfection Color Set Powder
- Powder Perfection Activator
- EDGE Silver 180 File
- FLEX Silver 100/180 Buffer
